-2.5%

A recalibrated leasing tempo as of the first quarter of 2024, coupled with a recently robust delivery schedule, has generated significant upward pressure on vacancies in Vancouver. Resulting annual rent growth of -2.5% has corrected sharply from its 10-year peak of 9.1% achieved in mid-2022. Starts over the past few quarters have slowed, however, and the pause could allow the submarket some time to catch up with the recently completed communities.

According to the U.S. Census Bureau, Vancouver remains one of the few areas in the region that posted positive population growth during the most recently reported 2021 to 2022 period, which highlights its desirability. Data and insights from local public officials indicate a healthy portion of this growth is being generated by positive net migration trends from outside of state lines, not just residents leaving Portland and moving across the Columbia River. Therefore, over the long term, if current economic drivers remain intact, those looking to relocate to the region may continue to target Vancouver.

As developers respond to drivers such as strong population growth, they have been welcomed with an abundant inventory of readily buildable land and favorable development and planning policies, which has allowed them to bring supply to the submarket faster to target growing neighborhoods with more efficiency. The wave of new units witnessed over the past decade as a result has expanded total inventory by 44.8%, which substantially outpaces the larger metro's growth rate of 34.7% and has positioned Vancouver as Portland's largest submarket by unit count.

New units delivering to the submarket include primarily mid-tier and luxury offerings, which has boosted the pool for potential investment purchases. However, while buyers remain opportunistically active across a range of newer and smaller assets, total sales volume over the preceding 12-month period of \$137 million is trending well below the previous five-year peak of \$946 million. Tightening liquidity in capital markets as a result of the Federal Reserve's battle against inflation has stalled deal flow substantially.

Multifamily vacancies in Vancouver have reacted violently to a heavy pipeline over the past five years, with resulting cumulative deliveries totaling 7,900 units during this time. Move-in frequencies have tapered off as some residents are trimming budgets and reconsidering forming new households in response to economic uncertainty. Thus, trailing 12-month absorption of 1,425 units reflects a decline from the previous trailing 12-month peak of 2,033 units, measured during 2021. Trailing 12-month net deliveries equate to 3,000 units, which has pushed vacancies to 8.2%, for a one-year change of 3.9%. Average vacancies over the past five years equate to 5.6%.

Newer deliveries such as Cohen North have produced lease-up rates of 18 units per month for the 110-unit community, but this pace reflects a visible downshift

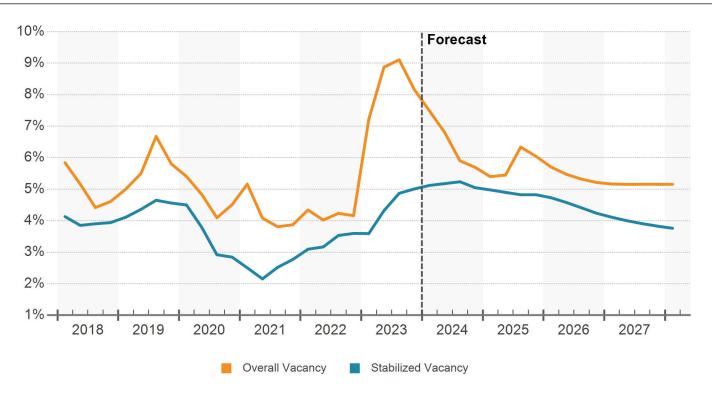

when compared to two other examples delivered in 2021 during the leasing peak. The 288-unit Acero Jensen Park indicated absorption rates for the complex of 30 units per month, and the 178-unit Kestrel Park Apartments saw early absorption figures of 25 units per month.

Rent growth has reactively slowed, as landlords compete for tenants and lose some pricing power. Trailing 12-month growth now equates to -2.5%, a sharp correction from both the all-time high of 9.1% and the prior five-year average of 3.8%. Nonetheless, a structural draw for that figure to remain in place is Washington's lack of a state income tax. Some individuals have proved willing to locate in Washington and travel to Oregon for shopping to avoid Washington's sales tax.

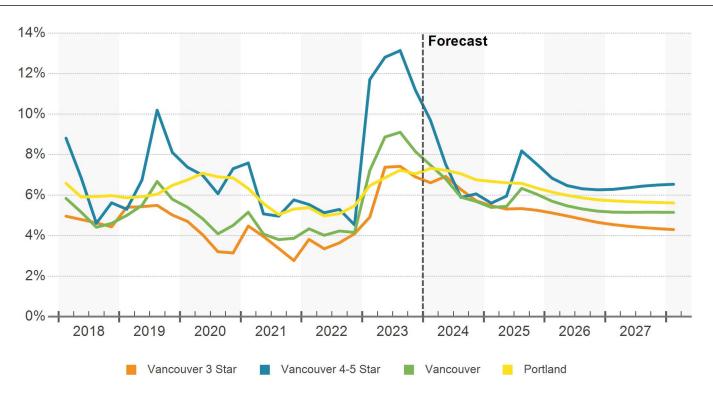

#### **ABSORPTION, NET DELIVERIES & VACANCY**

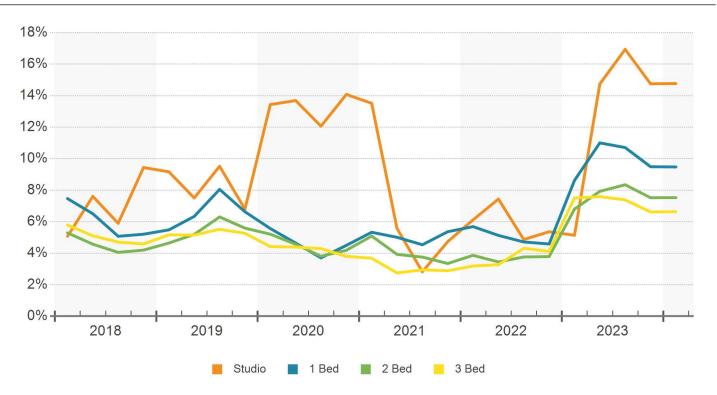

#### **OVERALL & STABILIZED VACANCY**

#### **VACANCY RATE**

# **VACANCY BY BEDROOM**

Market rents in Vancouver have grown -2.5% annually as of the first quarter of 2024, which is a sharp drop from the recent 10-year high mark of 9.1% achieved in mid-2022. Annual rent gains in Vancouver have averaged 3.8% over the past five years, for reference.

Vancouver rents of \$1,620/month are slightly above the larger metro average. The previous gap that had existed between Portland's market average rent and the Vancouver rate began to narrow significantly by early 2020. Cumulative rent gains in Vancouver amount to approximately 48.6% over the past decade, comfortably outpacing larger metro growth of 40.3%. However, rental rates are not uniform across the submarket, several pockets boast higher rates given proximity to amenities and other desirable characteristics.

The submarket's most expensive apartments are typically found near Downtown Vancouver, or along the waterfront, where newly delivering communities are

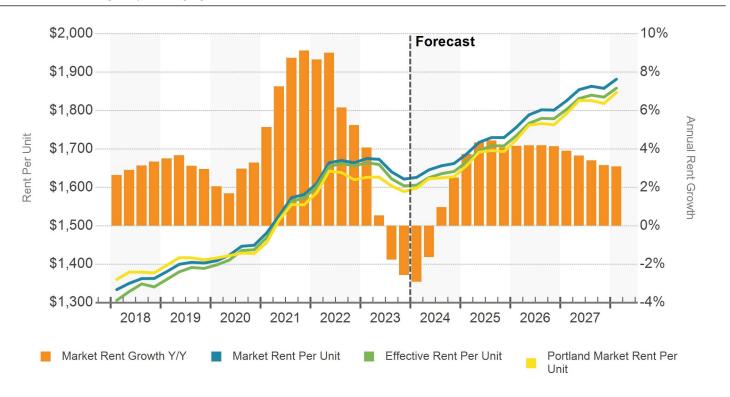

pricing well above \$2,000/month. For example, at the 178-unit Broadstone Claro in the Vancouver Waterfront neighborhood, average rents are around \$2,200/month, an approximately 35% premium to the submarket average. In addition, at the 248-unit Columbia at the Waterfront, rents average just over \$2,100/month, with some select two-bedroom offerings posting rents well above \$3,000/month. Both communities are hovering near stabilization, highlighting the draw that tenants have to the area, which includes plenty of shopping and fine dining.

In recent years, Oregon passed a statewide law capping annual rent increases at 7% plus inflation for apartments at least 15 years old. The law was recently amended to cap rents at a maximum 10% increase, which would be above the submarket's all-time average annual growth of 2.7%. Rent cap legislation could, nonetheless, cause investors and developers to think twice about Portland and shift more attention to Vancouver has time goes on.

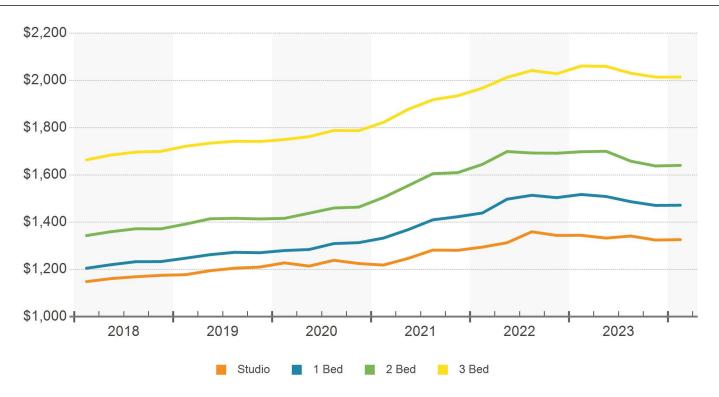

#### **DAILY ASKING RENT PER SF**

#### **MARKET RENT PER UNIT & RENT GROWTH**

#### MARKET RENT PER UNIT BY BEDROOM

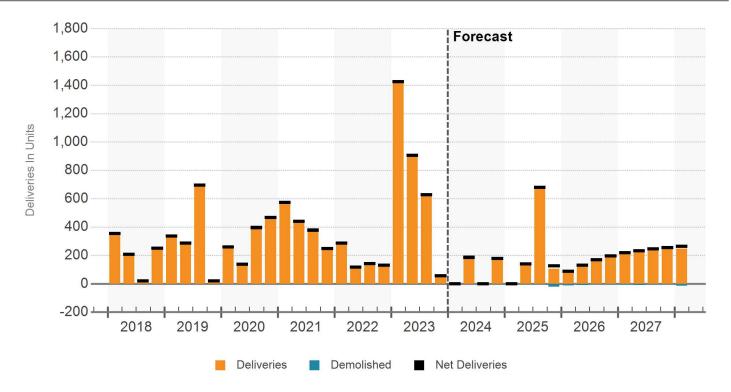

As of the first quarter of 2024, there are 1,300 units under construction, contributing a healthy proportion to the Portland metro's pipeline total of 7,800 units. These projects will expand existing inventory in Vancouver by 3.5%. Developers have spread out and prefer gardenstyle apartments that not only are cost-effective but require a less intensive engineering process. Examples include major recent deliveries such as IDM Companies' 300-unit Meritum Evergreen, which wrapped up construction in 23Q1. The 3 Star complex is located on 136th Avenue, just south of Evergreen High School.

Trailing 12-month net deliveries total 3,000 units, compared with the 10-year average of 1,200 units per year, and approximately 1,400 units were absorbed over

the past year. Population growth in Vancouver has been driven by a favorable income tax environment and high quality of life. Developers chasing inmigration trends here historically have had an easier time bringing projects out of the ground than their Portland counterparts. Planning and permitting processes are less cumbersome; there are no rent control or inclusionary zoning mandates; and most of all, there is an ample supply of developable land, given historical annexation trends.

Favored areas of the submarket for new builds include the Vancouver Waterfront, close to job nodes and amenities, while neighborhoods east of the I-205 corridor generally have larger tracts of developable land at a lower acquisition price point.

|-----|-------------------------------------------|--------|-------|---------|----------|----------|-----------------------------------------------|
| 1   | Renaissance Boardwalk 111 SE Columbia Way | ****   | 220   | 8       | Jun 2024 | Jun 2025 | Kirkland Development Kirkland Development LLC |
| 2   | 12518 NE 114th St                         | ****   | 6     | 2       | Jan 2024 | Aug 2024 | -                                             |

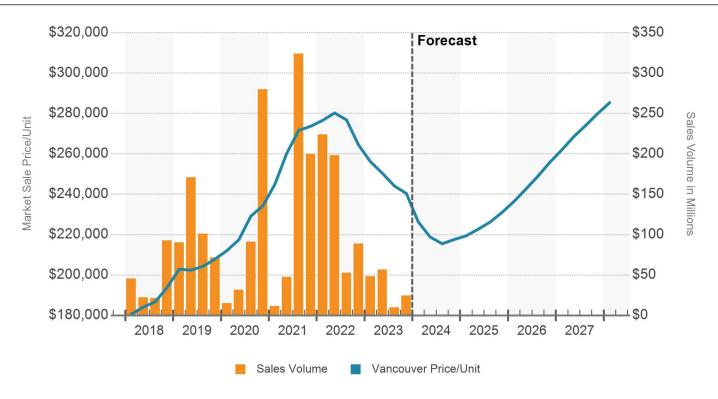

Trailing 12-month sales volume as of the first quarter of 2024 equates to \$137 million, versus the five-year average mark of \$423 million and the all-time peak of \$946 million reached in 2022. Headwinds have formed in response to tightening lending conditions resulting from the Federal Reserve's monetary policy to combat inflation. Bid-ask spreads have thus widened, as buyers and sellers try to become comfortable with a high rate environment and pencil out return needs. Given these macroeconomic factors, deal flow could sputter in coming quarters.

Investors had jumped on several newer communities in Vancouver during 23Q2, including the 50-unit JAX for \$16 million (\$320,000) and the 50-unit Ridgeline View

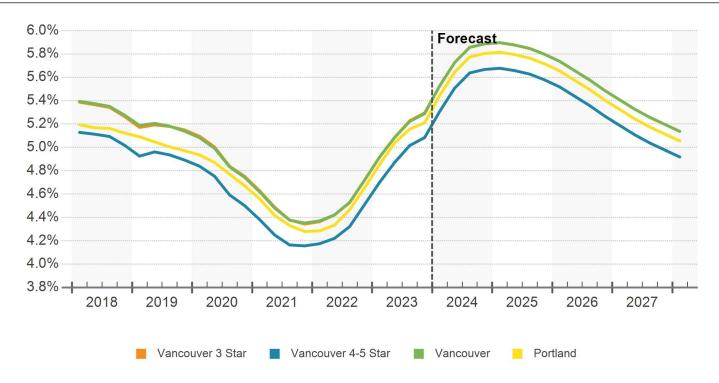

for \$18.1 million (\$362,000), both delivered within the past year. Both properties were stabilized, with the JAX generating a below-trend 5% cap rate. The newer conditions and stabilized occupancy, which would preclude hefty maintenance and lease-up costs, drove pricing on these deals above metro trends on a per-unit basis.

On balance, Vancouver's market sale price currently trends to \$240,000/unit, below the record high of \$280,000/unit seen in mid-2022. Recent deals aside, elevated borrowing rates and economic uncertainty will likely need to subside before more buyers enter the market again en masse. CoStar forecasts pricing could fall another 10% or so to a trough in late 2024.
